Summary Statement

Monthly and last three months: February/December 2025 to February 2026 statement

The rainfall was normal for both February and the period from December 2025 to February 2026.

Part 1i. Monthly and Seasonal Outlooks for April and April to June 2026

Monthly /Seasonal rainfall and temperature Outlook statements

The rainfall for April is very likely to be near normal while the rainfall for April to June is likely to be above normal for the island.

Maximum and minimum temperatures during April and the average temperature for April to June are very likely to be above normal.

Part 2: Recent Ocean summary statement

Monthly and last three months: February/December 2025 to February 2026

February sea surface temperatures (SSTs) around Nauru were 0.8 to 2.0°C above-normal.

Averaged over December 2025 to February 2026, sea surface temperatures around Nauru were February sea levels around Nauru were

A coral bleaching [Watch] status is currently in effect for [Nauru] as of [01 March].

Part 2i. Monthly and Seasonal Outlooks for April and April to June 2026

Ocean Variable statement

April 2026 sea surface temperatures and the average sea surface temperature for April to June around Nauru are predicted to be above normal.

April 2026 sea levels around Nauru are predicted to be above normal.

Averaged over April to June 2026, sea levels around Nauru are predicted to be near-normal.

Coral Bleaching outlook indicates [Alert Level 1] status for the next 12 weeks.

In brief for Teleconference

- Rainfall was normal for Nauru from December 2025 to February 2026.
- The rainfall outlook generally indicates near-normal most likely in April 2026 but above normal for total rainfall over April to June 2026.
- SSTs were above normal for February and near-normal December 2025 to February 2026. The outlook shows above normal SSTs for the next one and three months.
- Sea levels were above normal for February. Near-normal sea levels are predicted for April and April to June 2026.
- Coral bleaching: Alert Level 1
