Pacific 4-week Coral Bleaching Outlook (Image 10):

Summary Statement

Monthly and last three months: April and February to April 2026 statement

The rainfall for April and February to April was above normal over Nauru.

Part 1i. Monthly and Seasonal Outlooks for June and June to August 2026

Monthly /Seasonal rainfall and temperature Outlook statements

The rainfall for June 2026 is very likely to be above normal

The rainfall for June to August 2026 is also very likely to be above normal for the island.

Maximum and minimum temperatures during June and the average temperature for June to August are very likely to be above normal.

Part 2: Recent Ocean summary statement

Monthly and last three months: April and February to April 2026

April sea surface temperatures (SSTs) around Nauru were 1.0 to 1.5°C above normal.

Averaged SSTs over February to April 2026 were 0.4 to 2.0°C,

April sea levels around Nauru were 100 to 300mm

Coral bleaching Status shows alert levels 2 and 1 over Nauru

Part 2i. Monthly and Seasonal Outlooks for June and June to August 2026

Ocean Variable statement

June 2026 sea surface temperatures and the average sea surface temperatures for June to August around Nauru are predicted to be 0.4 to 1.2°C above normal.

June 2026 sea levels around Nauru are predicted to be slightly above normal. For the next 3-month outlook from June to August, sea levels are predicted to be near normal.

Coral Bleaching outlook (**Couldn't load images**)

In brief for Teleconference

- Rainfall was above normal for April and February to April 2026.
- The rainfall outlook generally indicates above normal most likely in June and the next 3month from June to August 2026.
- SSTs were slightly above normal for April.

TABLE 3: Stakeholder Engagement- Evaluations of how effective NMS engage with stakeholders (February 2026)
