

Pacific Islands - Online Climate Outlook Forum (OCOF) No. 150

Country: Tuvalu

TABLE 1: Monthly Rainfall

| Station (include data period) | Dec-2019   | Jan-2020   | Feb-2020      |         |         |        | Rank  |
|-------------------------------|------------|------------|---------------|---------|---------|--------|-------|
|                               |            |            | Total (mm)    | 33%tile | 67%tile | Median |       |
|                               | Total (mm) | Total (mm) | Rainfall (mm) |         |         |        |       |
| Nanumea (1941-2020)           | 431.0      | 432.7      | 788.3         | 164.6   | 328.4   | 263.0  | 80/80 |
| Nui (1946-2020)               | 523.4      | 394.0      | 565.0         | 223.0   | 352.8   | 281.2  | 68/74 |
| Funafuti (1933-2020)          | 426.1      | 553.3      | 644.5         | 257.9   | 426.0   | 330.0  | 81/87 |
| Niulakita (1953-2020)         | 428.0      | 546.6      | 662.7         | 265.7   | 383.5   | 325.1  | 62/65 |

**TABLE 2: Three-month Rainfall for December 2019 to February 2020**

| Station               | Three-month Total |              | 33%tile | 67%tile | Median | Rank  | SCOPIC forecast probabilities based on NINO3.4 September-October 2019 |    |     |      | Verification: Consistent, Near-consistent, Inconsistent? |
|-----------------------|-------------------|--------------|---------|---------|--------|-------|---|----|-----|------|--|
|                       | Rainfall (mm)     |              |         |         |        |       | B-N   | N  | A-N | LEPS |  |
| Nanumea (1941-2020)   | 1652.0            | Above normal | 766.1   | 1129.8  | 972.5  | 76/78 | 17  | 38 | 45  | 35   | Consistent   |
| Nui (1946-2020)       | 1482.4            | Above normal | 842.7   | 1175.0  | 1060.8 | 68/74 | 26  | 37 | 37  | 24   | Near-consistent  |
| Funafuti (1933-2020)  | 1623.9            | Above normal | 1000.2  | 1253.1  | 1135.4 | 81/87 | 30  | 36 | 34  | -1   | Near-consistent  |
| Niulakita (1953-2020) | 1637.3            | Above normal | 886.5   | 1174.2  | 1017.8 | 62/65 | 38  | 36 | 26  | 6    | Inconsistent   |

**TABLE 4: Seasonal Climate Outlooks using POAMA2 for April to June 2020**

| Station   | Below Normal (prob) | 33%ile Rainfall (mm) | Normal (prob) | 67%ile Rainfall (mm) | Above Normal (prob) |
|-----------|---------------------|----------------------|---------------|----------------------|---------------------|
| Nanumea   | 42                  | 626.0                | 30            | 891.0                | 28                  |
| Nui       | 46                  | 559.0                | 30            | 809.0                | 24                  |
| Funafuti  | 64                  | 638.0                | 9             | 829.0                | 27                  |
| Niulakita | 55                  | 565.0                | 24            | 648.0                | 21                  |

## **Summary Statements**

### **Rainfall for February 2020:**

Above normal rainfall was collected at all stations in Tuvalu. Nanumea recorded it wettest February on record while other stations also recorded rainfall above the ninetieth percentile.

### **Accumulated rainfall for December 2019 to February 2020, including outlook verification:**

The past three months were very wet across Tuvalu: the December to February period was the third wettest on record at Nanumea, the fourth wettest at Niulakita and the seventh wettest at both Nui and Funafuti. The outlook issued in November verified as Consistent at Nanumea, Near-consistent at Nui and Funafuti, and Inconsistent at Niulakita.

### **Outlooks for April to June 2020:**

#### **1. SCOPIC:**

The outlook for the season for all station shows above normal rainfall as the most likely outcome, with normal rainfall as the next most likely. Below normal rainfall is the least likely. The skills of the model is high at Nanumea, moderate at Nui and Niulakita, and very high at Funafuti.

#### **2. POAMA:**

The POAMA model gives a contrary result: the outlook for Funafuti and Niulakita favours below normal rainfall, and at Nanumea and Niu it shows below normal rainfall as the most likely outcome, with normal rainfall as the next most likely. Above normal rainfall is the least likely outcome.

**NB: The X LEPS % score has been categorised as follows:**

Very Low:  $X < 0.0$

Low:  $0 \leq X < 5$

Moderate  $5 \leq X < 10$

Good:  $10 \leq X < 15$

High:  $15 \leq X < 25$

Very High:  $25 \leq X < 35$  Exceptional:  $X \geq 35$
