Summary Statements

Rainfall for June 2016:

Rainfall for the past month was below normal for all stations except for Pekoa and Whitegrass which recorded normal rainfall.

Accumulated rainfall for April to June 2016, including outlook verification:

Rainfall for the past three months was below normal for all stations (Sola, Pekoa, Lamap, Bauerfield, Port Vila, Aneityum and White Grass). Sola recorded the driest for the period April – June.

The outlook was consistent for all stations (Sola, Pekoa, Lamap, Port Vila, Aneityum and White Grass) except Bauerfield which was near consistent.

Outlooks for August to October 2016:

1. SCOPIC:

Using NINO 3.4 SST Anomalies; The outlook favours below normal for all stations with normal being the next most likely.

2. POAMA:

- The outlook favours above normal rainfall for Sola, Bauerfield and Port Vila.
- The most likely outcome at Aneityum is normal rainfall.
- The outlook offers little guidance for Pekoa, Lamap and Whitegrass for the coming season

NB: The X LEPS % score has been categorised as follows:

Very Low: X < 0.0Low: $0 \le X < 5$ Very High: $25 \le X < 35$ Exceptional: $X \ge 35$

Low: $0 \le X < 5$ Moderate $5 \le X < 10$

Good: $10 \le X < 15$ High: $15 \le X < 25$
