Country	Rainfall Outlook	Skill
Cook Islands	Above Normal	Moderate
FSM	Above Normal	Low
Fiji	Normal to Below	Very High
Kiribati	Below Normal	Very High
Marshall Islands	Above Normal	High
Nauru	Below Normal	Very High
Niue	Above Normal	Moderate
Palau	Above Normal	Moderate

Samoa	Normal	Low
Solomon Islands	Above Normal	Moderate
Tonga	Normal to Above	Moderate
Tuvalu	Normal	High
Vanuatu	Normal to Below	Moderate to High

**Note:** Variation in the skill is due to model agreement and data availability at each location. Contact your location Meteorology Service for site specific forecast.

The consensus rainfall and temperature forecasts are derived from a multi-model ensemble (MME) of all available Dynamical Models that are provided by WMO Global Producing Centers (GPCs) available on CLIK Pacific (CLIK®) or Climate Services Toolkit for the Pacific.

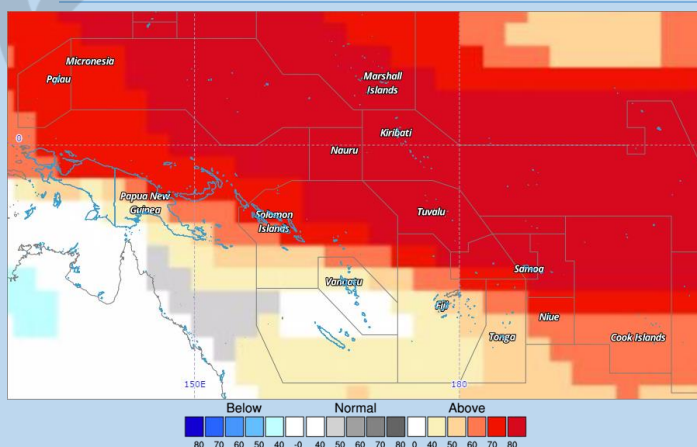

CLIK® is a product of the Republic of Korea-Pacific Islands Climate Prediction Services Project (ROK-PI CliPS).

The dynamical model data from individual models is available in the Supplementary material.
