

CLIMATE SCIENCE TRAINING FOR SECTORS

SESSION 1 - Introduction

Climate Science Training for Sectors

Session 1: Introduction

Objectives

This course aims to support participants to apply climate science information in their particular sector. This is in order to maximise opportunity and minimise risk in relation to preparation, planning and mitigating climate events. This course is tailored to Vanuatu's unique climate and how it affects key sectors in Vanuatu.

Expectation

It is expected that the participants will be able to utilise the information and learnings in this course to support their particular sector which in turn better protects the people and property of Vanuatu against climate and climate change impacts.

Key Sectors targeted in this workshop

- Agriculture
- Fisheries
- Infrastructure
- Tourism
- Water
- Other sectors such as health, environment, DRR can also be involved.

Workshop Sessions

- **Session 1:** Introduction
- **Session 2:** The Climate System
- **Session 3:** Climate Change
- **Session 4:** Climate in Vanuatu
- **Session 5:** Seasonal Climate Forecasting and Drought Monitoring
- **Session 6:** Ocean Information Products
- **Session 7:** Climate Information Applications

Self Introduction

State your name.

Where you work and what your role is.

How do you use climate information in your job?

Who is your favourite rugby team?

Exercise: Self Assessment

Please fill out all areas of the self assessment

The self assessment is for the participants and not to be reviewed or used by anyone else

The assessment covers the concepts and topics covered in the course and gives the participants an opportunity to gauge their understanding before embarking on the course.

It allows participants to identify areas of strength and where further information and support is needed.
